Animal Protection Society of Durham Adoption: Find Your Furry Best Friend

Are you looking to open your heart and home to a loving companion? The Animal Protection Society of Durham (APSD) offers a heartwarming opportunity to adopt a deserving animal in need. This comprehensive guide will walk you through the adoption process at APSD, covering everything from finding the perfect pet to navigating the adoption paperwork. We'll explore the types of animals available, the requirements for adoption, and what you can expect after bringing your new furry, feathered, or scaled friend home. Get ready to embark on a journey that could change both your life and the life of a wonderful animal!

Finding Your Perfect Match at the Animal Protection Society

of Durham

The Animal Protection Society of Durham boasts a diverse population of animals waiting for their forever homes. Before you visit, take some time for self-reflection. Consider your lifestyle, living situation (apartment vs. house, yard space, etc.), and the time commitment you can realistically offer. Are you prepared for the energy level of a playful puppy, or would a calmer senior cat be a better fit?

Types of Animals Available for Adoption

APSD typically houses a range of animals, including:

Dogs: From tiny Chihuahuas to majestic Great Danes, you'll find a variety of breeds and ages. Their website often features detailed profiles with photos and personality descriptions.

Cats: Independent felines, playful kittens, and cuddly seniors - APSD caters to every cat lover. Many cats have already been assessed for their temperament and social skills.

Small Animals: Depending on availability, you might find rabbits, guinea pigs, hamsters, or other small animals seeking loving homes.

Occasionally other animals: The shelter may occasionally care for birds, reptiles, or other animals, depending on rescue situations.

Browsing Animals Online: A Head Start on Your Search

Before your visit, explore the APSD website. They likely have an online database of adoptable animals with pictures, descriptions, and sometimes even videos! This allows you to pre-select potential companions and make your visit more efficient.

The Animal Protection Society of Durham Adoption Process: A Step-by-Step Guide

The APSD adoption process aims to ensure a successful match for both the animal and the adopter. Expect a thorough but friendly process designed to guarantee a happy ending.

Step 1: Application and Pre-Screening

You'll likely need to fill out an application online or at the shelter. This application gathers information about your living situation, experience with pets, and lifestyle. This helps APSD staff determine if you're a suitable match for a specific animal.

Step 2: Meeting Your Potential Pet

Once your application is approved, you'll have the opportunity to meet the animals that caught your eye. Spend quality time interacting with them to assess compatibility. Don't hesitate to ask questions about the animal's history, temperament, and needs.

Step 3: Adoption Counseling and Decision-Making

APSD staff are invaluable resources. They can provide insights into each animal's personality and help you find the best fit. Take your time; choosing a pet is a big decision!

Step 4: Adoption Fee and Paperwork

There will be an adoption fee, which contributes to the shelter's operating costs and helps them continue to rescue and care for animals. You'll need to complete the necessary paperwork and agree to the terms of adoption.

Step 5: Bringing Your New Friend Home

Congratulations! You're ready to bring your new companion home. Remember that it takes time to adjust. Be patient, provide plenty of love, and enjoy the journey of building a special bond with your new family member.

Post-Adoption Support and Resources

APSD often provides post-adoption support, offering advice and resources to ensure a smooth transition. This might include access to training classes, veterinary resources, or simply a helpful ear to listen to your questions and concerns. Check their website or contact them directly for details.

Conclusion

Adopting a pet from the Animal Protection Society of Durham is a rewarding experience that changes the lives of both you and your new companion. By following the steps outlined above, and by carefully considering your lifestyle and the needs of the animal, you can find your perfect furry, feathered, or scaled friend. Remember to be patient, responsible, and prepared for the joy and responsibility that pet ownership entails.

FAQs

1. What is the adoption fee at the Animal Protection Society of Durham? The adoption fee varies depending on the animal and may cover vaccinations, spaying/neutering, and microchipping. Check their website or contact them directly for current pricing.
2. Do I need to have a fenced yard to adopt a dog? This depends on the specific dog. Some dogs are perfectly happy in apartment living, while others require more space. APSD staff will help match you with a dog whose needs align with your lifestyle.

3. What if I need to return my adopted pet? While APSD hopes every adoption is successful, they understand that sometimes things don't work out. Contact them immediately to discuss your situation; they may offer guidance or support.
4. What kind of vetting process do the animals go through? APSD typically provides necessary vaccinations, spaying/neutering, and medical checkups before adoption. Details may vary depending on the animal's individual needs.
5. How can I contact the Animal Protection Society of Durham? Their website will likely have contact information, including phone number, email address, and physical location. You can also find them on social media platforms.

animal protection society of durham adoption: **The Lives and Deaths of Shelter Animals**

Katja M Guenther, 2020-08-18 "By investigating the . . . connection between the . . . shelter and the community . . . vastly expands . . . notions of intersectionality, democracy, and inclusivity." —Leslie Irvine, *American Journal of Sociology* Monster is an adult pit bull, muscular and grey, who is impounded in a large animal shelter in Los Angeles. Like many other dogs at the shelter, Monster is associated with marginalized humans and assumed to embody certain behaviors because of his breed. And like approximately one million shelter animals each year, Monster will be killed. The *Lives and Deaths of Shelter Animals* takes us inside one of the country's highest-intake animal shelters. Katja M. Guenther witnesses the dramatic variance in the narratives assigned different animals, including Monster, which dictate their chances for survival. She argues that these inequalities are powerfully linked to human ideas about race, class, gender, ability, and species. Guenther deftly explores internal hierarchies, breed discrimination, and importantly, instances of resistance and agency. "Powerful and timely. . . . Katja M. Guenther unlocks the shelter door and eloquently explains this complicated and contested multispecies space, as she reflects on issues such as witnessing, vulnerability, advocacy, grievability, compassion, and animal resistance." —Carol J. Adams, author of *The Sexual Politics of Meat* "In this compassionate, incisive ethnography . . . Katja M. Guenther illuminates the entangled injustices that shape human relationships with other animals." —Lori Gruen, author of *Entangled Empathy* "With the perfect balance of intimacy and analytical depth, the author reminds us of how messy things can get when caring and killing become one, or when the value of the animal companion's life is measured by the race, gender, and zip code of the owner." —Bénédicte Boisseron, author of *Afro-Dog*

animal protection society of durham adoption: Saving Sadie Joal Derse Dauer, Elizabeth Ridley, 2017-09-26 "I fell in love with Sadie as you will, too."—Fern Michaels Joal Derse Dauer was donating blankets at a local no-kill shelter when an injured and despondent dog caught her eye. With three "fur babies" already at home, Joal wasn't looking to adopt another dog. But there was something special about Sadie . . . With patience, hope, and plenty of love, Joal saw her canine companion grow in strength and joy. And before long, she discovered that sweet Sadie had

transformed her life in ways she never could have imagined. Joyous and inspiring, *Saving Sadie* is a triumphant story about the power of unconditional love and second chances—for humans and animals alike. “A triumphant tale of second chances that shows how patience, hope, compassion and love can truly transform lives.” —Modern Dog “An uplifting story with tremendous heart. I couldn't put it down.” —Helen Brown “*Saving Sadie* will lift your spirit and open your heart. A must-read.” —Jodee Blanco “What a wonderful book—moving and inspirational, touching and heartwarming.” —Sue Pethick

animal protection society of durham adoption: *Animal Cruelty* Mary P. Brewster, Cassandra Reyes, 2016 *Animal Cruelty* is an anthology that addresses all critical aspects of animal cruelty including: its history and prevalence; related legislation; special types of cruelty (hoarding, poaching, blood sports, etc.); its link to other types of violence and crime; theories used to explain animal cruelty; the role of the media; and emerging issues related to animal cruelty. The text is suitable for undergraduate and graduate classes in criminal justice, criminology, psychology, law, sociology, animal studies, and other disciplines, and is especially well-suited for use in classes on such topics as animal cruelty, animal welfare, deviant behavior, animal law, violent crime, veterinary studies, abnormal psychology, and animal husbandry. This second edition includes chapter updates related to legislation, prevalence and incidence of animal cruelty, and research findings, as well as the addition of two completely new chapters related to veterinary forensics and cruelty towards roaming dogs.

animal protection society of durham adoption: Happily Ever Esther Steve Jenkins, Derek Walter, 2018-07-10 From the New York Times bestselling authors and loving owners of *Esther the Wonder Pig*, comes a memoir about their new life on the Happily Ever Esther Farm Sanctuary, which is anything but boring. Steve Jenkins and Derek Walter, had their lives turned upside down when they adopted their pig-daughter Esther--the so-called micro pig who turned out to be a full-sized commercial pig growing to a whopping 600 pounds--as they describe in their bestselling memoir *Esther the Wonder Pig*. The book ends with them moving to a new farm, and starting a new wonderful life where they will live on the Happily Ever Esther Farm Sanctuary to care for other animals and just live happily ever after... Or so they thought. People often think about giving it all up and just moving to a farm. In theory it sure does sound great. But as Derek and Steve quickly realized, the realities of being a farmer--especially when you have never lived on a farm let alone outside of the city--can be frantic, crazy, and even insane. Not only are they adjusting to farm life and dutifully taking care of their pig-daughter Esther (who by the way lives in the master bedroom of their house), but before they knew it their sanctuary grew to as many as 42 animals, including: pigs, sheep, goats, rabbits, chickens, cows, roosters, a peacock, a duck, a horse, a donkey, and a barn cat named Willma Ferrell. Written with joy and humor, and filled with delicious Esther-approved recipes dispersed throughout the book, this charming memoir captures an emotional journey of one little family advocating for animals everywhere.

animal protection society of durham adoption: **Applied Ethics in Animal Research** John P. Gluck, Tony DiPasquale, F. Barbara Orlans, 2002 This volume is a collection of chapters all contributed by individuals who have presented their ideas at conferences and who take moderate stands with the use of animals in research. Specifically the chapters bear of the issues of: notions of the moral standings of animals, history of the methods of argumentation, knowledge of the animal mind, nature and value of regulatory structures, how respect for animals can be converted from theory to action in the laboratory. The chapters have been tempered by open discussion with individuals with different opinions and not audiences of true believers. It is the hope of all, that careful consideration of the positions in these chapters will leave reader with a deepened understanding--not necessarily a hardened position.

animal protection society of durham adoption: **Preventing HIV Transmission** National Research Council and Institute of Medicine, Institute of Medicine, Panel on Needle Exchange and Bleach Distribution Programs, 1995-09-14 This volume addresses the interface of two major national problems: the epidemic of HIV-AIDS and the widespread use of illegal injection drugs. Should communities have the option of giving drug users sterile needles or bleach for cleaning needs in order to reduce the spread of HIV? Does needle distribution worsen the drug problem, as opponents of such programs argue? Do they reduce the spread of other serious diseases, such as hepatitis? Do they result in more used needles being carelessly discarded in the community? The panel takes a critical look at the available data on needle exchange and bleach distribution programs, reaches conclusions about their efficacy, and offers concrete recommendations for public policy to reduce the spread of HIV/AIDS. The book includes current knowledge about the epidemiologies of HIV/AIDS and injection drug use; characteristics of needle exchange and bleach distribution programs and

views on those programs from diverse community groups; and a discussion of laws designed to control possession of needles, their impact on needle sharing among injection drug users, and their implications for needle exchange programs.

animal protection society of durham adoption: From Guinea Pig to Computer Mouse Ursula Zinko, Nick Jukes, Corina Gericke, 1997

animal protection society of durham adoption: The Educational Significance of Human and Non-Human Animal Interactions Suzanne Rice, A. G. Rud, 2016-04-29 The Educational Significance of Human and Non-Human Animal Interactions explores human animal/non-human animal interactions from different disciplinary perspectives, from education policy to philosophy of education and ecopedagogy. The authors refute the idea of anthropocentrism (the belief that human beings are the central or most significant species on the planet) through an ethical investigation into animal and human interactions, and 'real-life' examples of humans and animals living and learning together. In doing so, Rice and Rud outline the idea that interactions between animals and humans are educationally significant and vital in the classroom.

animal protection society of durham adoption: **Transforming the Workforce for Children Birth Through Age 8** National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

animal protection society of durham adoption: *The Forever Dog* Rodney Habib, Karen Shaw Becker, 2021-10-12 THE INSTANT #1 INTERNATIONAL BESTSELLER In this path-breaking guide, two of the world's most popular and trusted pet-care advocates reveal how to delay aging and provide a long, happy, healthy life for our canine companions Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration and autoimmune disorders—also beset canines. As a result, our beloved companions struggle with preventable health problems throughout much of their lives. Because dogs can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices on their behalf. Rodney Habib and Karen Becker, DVM, travelled the world

collecting wisdom from top geneticists, microbiologists and longevity researchers. They also interviewed people whose dogs have lived into their twenties and even thirties. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including details commercial manufacturers don't want us to know—and offer recipes, tips and easy solutions for ensuring our dogs obtain the nutrients they need. They also explore how external factors that we often overlook can greatly affect a dog's overall health and well-being—including the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." This definitive dog-care guide empowers us with the knowledge we need to make wise choices and keep our dogs healthy and happy for years to come.

animal protection society of durham adoption: *Can Animals Be Moral?* Mark Rowlands, 2015-03 Can animals act morally? Philosophical tradition answers no, and has apparently convincing arguments on its side. Cognitive ethology supplies a growing body of empirical evidence that suggests these arguments are wrong. This groundbreaking book assimilates both philosophical and ethological frameworks into a unified whole and argues for a qualified yes.
