turkish serials in russian: *From Media Systems to Media Cultures* Sabina Mihelj, Simon Huxtable, 2018-08-23 In *From Media Systems to Media Cultures: Understanding Socialist Television*, Sabina Mihelj and Simon Huxtable delve into the fascinating world of television under communism, using it to test a new framework for comparative media analysis. To understand the societal consequences of mass communication, the authors argue that we need to move beyond the analysis of media systems, and instead focus on the role of the media in shaping cultural ideals and narratives, everyday practices and routines. Drawing on a wealth of original data derived from archival sources, programme and schedule analysis, and oral history interviews, the authors show how communist authorities managed to harness the power of television to shape new habits and rituals, yet failed to inspire a deeper belief in communist ideals. This book and their analysis contains important implications for the understanding of mass communication in non-democratic settings, and provides tools for the analysis of media cultures globally.

turkish serials in russian: Understanding Russia Marlene Laruelle, Jean Radvanyi, 2018-08-16 This timely book provides a balanced and comprehensive overview of the geographical, historical, political, cultural, and geostrategic factors that drive Russia today. Russia has long inspired fear in the West, but as the authors argue, Russia is fearful as well. Three decades after the transformations launched by perestroika, multiple ghosts haunt both Russian elites and ordinary citizens, ranging from concerns about territorial challenges, societal transformations, and economic decline to worries about the country's vulnerability to external intervention. Faced with a West that emerged victorious from the Cold War, a shockingly dynamic China, and former Soviet republics claiming their right to emancipate themselves from Moscow's stranglehold, Russia is constantly questioning its identity, its development path, and its role on the international scene. The country hesitates between two strategies: take refuge in a new isolation and revive the old notion of being a "besieged fortress," or replay the messianic myth of a Third Rome, the last bastion of Christian

values in the face of a decadent West. Explaining Russia's perspective, Marlene Laruelle and Jean Radvanyi offers a much-needed analysis that will help readers understand how the country deals with its domestic issues and how these influence Russian foreign policy.

turkish serials in russian: The Empress & the Architect Dmitriï Olegovich Shvidkovskiï, Dmitrij O. Švidkovskij, Professor Dimitri Shvidkovsky, 1996-01-01 In August 1779, Charles Cameron, a Scottish architect based in London, set sail for St. Petersburg. He had been summoned by Catherine the Great, Empress of Russia, to create a magnificent architectural setting for the splendours and extravagances of her court - most especially the two luxurious palace ensembles outside St. Petersburg at Tsarskoye Selo and Pavlovsk. His reputation prior to his arrival in Russia was based almost entirely on his authorship of a book on the baths of ancient Rome - he had built nothing as yet - but while serving as Architect to Her Imperial Majesty, Cameron was responsible for some of the most dazzling and original architectural creations of the eighteenth century. This book tells a fascinating story of enterprise, initiative, amazing patronage and very remarkable architectural achievements on a large scale, all of which took place within a unique historical and cultural context. Dimitri Shvidkovsky weaves together the intriguing, and still not completely documented biography of an enigmatic architect - possibly a Jacobite rebel and exile - and the life of the great Russian ruler, Catherine II. This is set against the backdrop of the rapidly developing influence of British culture on Russian society. Architects, park designers and gardeners from England and Scotland were to be found in every part of Russia by the end of the eighteenth and the beginning of the nineteenth century, helping to establish a particular form of design whose cultural impact was made all the more dramatic by its adoption and development by native Russian architects and designers. This book, ravishingly illustrated with views of the palaces and gardens of imperial Russia - many now destroyed - places Russian architecture and garden design of the neo-classical period within its European context for the first time, and explores the hitherto neglected connections between British and Russian architecture of the late eighteenth and early nineteenth centuries. It offers a fascinating and original account of Russian culture in this period.

turkish serials in russian: InTraders 2019: Academic studies in social, human and administrative sciences Hakan Murat ARSLAN, Adriana BURLEA-SCHIOPOIU, Liza ALILI SULEJMANI, 2020-01-29 The present study is an analysis of the connections established between the intercultural phenomenon and trade. Both intercultural contacts and commerce appeared and developed due to humans' mobility and their basis was exchange (either spiritual or material). Since the dawn of history people travelled a lot and exchanged knowledge and goods (for instance, silk was brought to Europe by two Byzantine monks from China, in 550 C.E.), so, travel generated interculturality and trade. Intercultural contacts can be positive (trade, for example) or negative (wars). One can say that interculturality is a trait of the human species. Many innovations in different fields spread due to intercultural exchange, globalisation is also based on cross-cultural or intercultural contacts. The Industrial Revolution and colonialism represented the main causes of the intensification of intercultural contacts which generated an increase in international trade. In contemporary human society, this kind of relationships is essential for development in any activity field. The globalised trade in nowadays world was generated by interculturality and World Trade Organization was founded to facilitate it and to create an international network; the technological evolution and the modern means of transport enhanced the relations between different cultures. Interculturality is an umbrella concept covering a diversity of domains: communication, religion, education, anthropology, literature etc. In this paper, we try to answer to the following question: "How can interculturality influence trade or vice versa?" by pointing out the main aspects of the analysed phenomena and their links. To accomplish this task we shall make use of the historical method and imagology.
