

Pn Pharmacology Online Practice 2020 A

PN Pharmacology Online Practice A 2020

1. A nurse is monitoring a client who has type 2 diabetes mellitus and is receiving repaglinide. Which of the following laboratory tests should the nurse plan to review to obtain information about the long-term therapeutic effect of this medication? - **Glycosylated HbA1c**
2. A nurse is reinforcing teaching with a client who is to start therapy using a nitroglycerin transdermal patch. Which of the following instructions should the nurse include?
 - a) Cover the patch with a dry dressing.
 - b) Apply another patch if experiencing chest pain.
 - c) Leave each patch in place for 24 hr.
 - d) **Place the patch on a different site for each application.** - Place the patch on a different site for each application.
3. A nurse is reinforcing teaching with a client who is using phenylephrine nasal spray three times daily and reports rebound congestion. Which of the following instructions should the nurse include to reduce the effects of rebound congestion?
 - a) "Decrease the frequency to twice daily."
 - b) "Continue use for one more week."
 - c) **"Discontinue use in the left nostril, then in the right nostril."**
 - d) "Add oxymetazoline nasal spray to relieve symptoms." - "Discontinue use in the left nostril, then in the right nostril."
4. At 0800 a nurse assists with initiating a 1,000 mL IV infusion for a client, which is running at 125 mL/hr. How much fluid is left in the IV bag at 1300? (Round the answer to the nearest whole number. Use a leading zero if it applies. Do not use a trailing zero.) - **375**
5. A nurse is caring for a client who has chronic kidney disease and has been receiving epoetin for 2 weeks. Which of the following findings should indicate to the nurse that the client's medication is having the desired therapeutic effect?
 - a) Albumin is within the expected reference range
 - b) Urine output increases to 60 mL/hr
 - c) **Hemoglobin rises 0.5 g/dL**
 - d) Blood urea nitrogen level is within the expected reference range - Hemoglobin rises 0.5 g/dL

PN Pharmacology Online Practice 2020: A Comprehensive Guide to Mastering Your Exams

Are you a PN student struggling to conquer pharmacology? Feeling overwhelmed by the sheer volume of information and the pressure of upcoming exams? You're not alone. Pharmacology is a critical component of your nursing education, and mastering it is essential for a successful career. This comprehensive guide focuses on effective online pharmacology practice resources specifically relevant to the 2020 timeframe, providing valuable insights and strategies to help you ace your exams and build a strong foundation in this crucial subject. We'll explore various online platforms, effective study techniques, and crucial tips to navigate the complexities of PN pharmacology.

Navigating the Landscape of PN Pharmacology Online Practice Resources (2020)

Finding reliable and relevant online resources for PN pharmacology can be challenging. The year 2020 saw a significant shift towards online learning, making access to quality materials more crucial than ever. While specific platforms and their availability may vary, the core principles of effective online practice remain the same. This section explores key aspects to consider when choosing your resources:

Identifying Reputable Sources:

Avoid unreliable websites or forums offering outdated or inaccurate information. Look for resources affiliated with reputable nursing schools, educational institutions, or professional organizations. Check for author credentials and ensure the information aligns with current pharmacology guidelines and best practices. Always cross-reference information from multiple sources to validate its accuracy.

Leveraging Online Question Banks and Practice Exams:

Many online platforms offer question banks and practice exams specifically designed for PN pharmacology. These platforms often allow you to track your progress, identify areas needing improvement, and simulate the exam experience. Look for features such as detailed explanations for each answer, adaptive learning algorithms that tailor questions to your strengths and weaknesses, and various question types (multiple choice, fill-in-the-blank, etc.).

Utilizing Interactive Learning Tools:

Beyond traditional question banks, explore interactive learning tools such as flashcards, diagrams, and simulations. These tools can enhance your understanding of complex concepts and make learning more engaging. Many apps and websites offer these features, catering to diverse learning styles.

The Importance of Focused Practice:

Don't just passively review material. Active recall through consistent practice is crucial for retention. Focus on high-yield topics frequently tested on PN pharmacology exams. Create your own flashcards or use pre-made sets to reinforce key concepts and medications.

Effective Study Strategies for PN Pharmacology

Effective online practice goes hand-in-hand with robust study strategies. Here's a breakdown of techniques to maximize your learning:

Prioritize Understanding Over Memorization:

While memorization is necessary, understanding the underlying mechanisms of action is crucial.

Focus on comprehending how drugs work, their indications, contraindications, side effects, and interactions. This approach will improve long-term retention and enable you to apply your knowledge in diverse clinical scenarios.

Break Down Complex Concepts:

Pharmacology can seem overwhelming. Break down large chunks of information into smaller, manageable pieces. Use mind maps, flowcharts, or other visual aids to organize complex concepts and relationships between different medications and systems.

Practice Active Recall Techniques:

Regularly test yourself without referring to notes. Use flashcards, practice questions, or teach the material to someone else to solidify your understanding and identify knowledge gaps.

Seek Feedback and Clarification:

Don't hesitate to ask for help if you're struggling with specific concepts. Utilize online forums (carefully vetting sources!), consult with professors or teaching assistants, or work with study groups.

Beyond the 2020 Resources: Adapting Strategies for Ongoing Success

While this guide specifically addresses online pharmacology practice resources relevant to 2020, the principles discussed remain timeless. The core elements of finding reputable sources, employing effective study techniques, and actively practicing remain essential for success in PN pharmacology regardless of the year. As new resources emerge, continue to critically evaluate their quality and relevance to your learning objectives.

Conclusion:

Mastering PN pharmacology requires dedication, effective study strategies, and access to reliable online resources. By focusing on understanding core concepts, leveraging reputable online question banks and interactive tools, and employing active recall techniques, you can build a solid foundation and confidently approach your exams. Remember to continuously evaluate and adapt your study methods to maximize your learning potential. Good luck with your studies!

FAQs:

1. Are there free online resources for PN pharmacology practice in 2020? Yes, several websites and educational institutions offered free resources in 2020, although availability may vary. Search for "free PN pharmacology practice questions" to explore options. However, always verify the reliability of the source.
2. How much time should I dedicate to online pharmacology practice? The amount of time required

depends on your individual learning style and the complexity of the material. Consistent, focused practice sessions are more effective than long, infrequent study periods. Aim for regular, shorter sessions interspersed with breaks.

3. What if I don't understand a concept after multiple attempts? Don't get discouraged! Seek help from your instructors, teaching assistants, or study groups. Explaining your confusion to others can help clarify your understanding.

4. Can online practice replace in-person learning? No, online practice should complement, not replace, in-person learning. It's a valuable tool for reinforcement and practice, but interactive classroom learning and direct interaction with instructors remain crucial.

5. What are some tips for managing exam anxiety while using online practice resources? Practice under timed conditions to simulate the exam environment. Focus on building confidence through consistent practice and identifying your strengths and weaknesses. Use relaxation techniques, like deep breathing, to manage stress before and during practice sessions.

pn pharmacology online practice 2020 a: Pharmacotherapeutics For Advanced Practice Nurse Prescribers Teri Moser Woo, Marylou V Robinson, 2015-08-03 This exceptional text builds your knowledge of pharmacology by first providing an overview of pharmacologic principles and then teaching you how to apply those principles to clinical practice. Focusing on applying pharmacologic scientific knowledge to clinical practice, it explains diagnostic and treatment reasoning and rational drug selection, while providing useful clinical pearls from experienced practitioners.

and answers at the conclusion of every chapter and a comprehensive exam at the end of every book in the series, all in the standard NCLEX format. A free CD-ROM with 150 NCLEX format questions is packaged with each title in the series. A Volume in the Rollant Nursing Review Series (Includes FREE CD-ROM)

pn pharmacology online practice 2020 a: *The Future of Nursing* Institute of Medicine, Committee on the Robert Wood Johnson Foundation Initiative on the Future of Nursing, at the Institute of Medicine, 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

pn pharmacology online practice 2020 a: Nursing2022 Drug Handbook Lippincott Williams & Wilkins, 2021-03-04 THE #1 Drug Guide for nurses & other clinicians...always dependable, always up to date! Look for these outstanding features: Completely updated nursing-focused drug monographs featuring 3,500 generic, brand-name, and combination drugs in an easy A-to-Z format NEW 32 brand-new FDA-approved drugs in this edition, including the COVID-19 drug remdesivir—tabbed and conveniently grouped in a handy “NEW DRUGS” section for easy retrieval NEW Thousands of clinical updates—new dosages and indications, Black Box warnings, genetic-related information, adverse reactions, nursing considerations, clinical alerts, and patient teaching information Special focus on U.S. and Canadian drug safety issues and concerns Photoguide insert with images of 439 commonly prescribed tablets and capsules

pn pharmacology online practice 2020 a: *Fundamentals of Pharmacology* Ian Peate, Barry Hill, 2021-02-08 All registered nurses must have a thorough understanding and a strong knowledge of pharmacology, medicines administration, and the ability to recognise and react to the effects of medicines. Fundamentals of Pharmacology helps nursing and healthcare students develop the skills and confidence required to apply the fundamental principles of pharmacology and to offer safe, competent and compassionate care. Concentrating on the medicines that students are most likely to encounter in real-world practice, this textbook provides concise coverage of pharmacology, essential medicines management principles, legal and ethical issues, drug formulations, analgesics, immunisations, and much more. Clinically focused chapters feature defined learning outcomes, multiple-choice questions, practical examples, and full-colour illustrations to aid readers' comprehension of the complexities of pharmacology and care provision. The book utilises a straightforward, student-friendly approach to present 'must-have' information, with contributions from experienced clinicians and academics. Describes how to use pharmaceutical and prescribing reference guides Stresses the role and importance of compassionate care throughout Contains a full range of pedagogical tools which enhance learning and recall Aligns with current NMC Standards and Proficiencies for Registered Nurses and Nursing Associates Supplemented and supported by a wealth of online extras and resources Fundamentals of Pharmacology is essential reading for all nursing students, trainee nursing associates, post-registration nurses taking 'nurse prescribing' or 'non-medical prescribing' modules, and newly qualified nurses and nursing associates looking to better understand pharmacology.

pn pharmacology online practice 2020 a: Pediatric Acute Care Beth Nachtsheim Bolick, Karin Reuter-Rice, Maureen A. Madden, Paul N. Severin, 2020-06-20 **Selected for Doody's Core Titles® 2024 in Critical Care** Stay up-to-date on the latest evidence and clinical practice in pediatric acute care with the definitive textbook in the field. Now in its second edition, *Pediatric Acute Care: A Guide for Interprofessional Practice* takes an evidence-based, interprofessional approach to pediatric acute care as it exemplifies the depth and diversity that's needed for the dynamic healthcare environments in which acutely ill children receive care. Coverage includes how to work with the pediatric patient and family, major acute care disorders and their management, emergency preparedness, common acute care procedures, and much more. With contributions from more than 200 practicing clinicians and academic experts, it represents a wide variety of disciplines including medicine, nursing, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology, among others. The second edition also features the addition of new physician and nurse practitioner co-editors as well as extensive content updates including updated evidence-based content throughout the text, the integration of the 2016 IPEC Core Competencies for Interprofessional Collaborative Practice, a new full-color design, and new vivid illustrations throughout. - UNIQUE! Interprofessional collaborative approach includes contributions from more than 200 practicing clinicians and academic experts from the U.S. and Canada, including nursing, medicine, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology. - Consistent organization within disorder chapters begins with a section on Physiology and continues with sections on Pathophysiology, Epidemiology and Etiology, Presentation, Differential Diagnosis, Diagnostic Studies, and a Plan of Care that include Therapeutic Management, Consultation, Patient and Family Education and Disposition and Discharge Planning. - Comprehensive content spanning five units divides coverage into introductory information, the approach to the pediatric patient and family, major acute care disorders and their management, emergency preparedness, and common acute care procedures. - NEW! Updated evidence-based content has been added throughout to ensure that you're up-to-date on all topics needed to provide care for pediatric patients in acute, inpatient, emergency, transport, and critical care settings. - NEW! Full-color design and illustrations enhance learning and make content easier to navigate and digest. - NEW! Integration of the 2016 IPEC Core Competencies ensure that you're learning the professional skills and protocols required for effective, contemporary interprofessional collaborative practice. - UPDATED! Streamlined procedures unit focuses more sharply on need-to-know content.

pn pharmacology online practice 2020 a: Paramedic Crash Course with Online Practice Test Christopher Coughlin, 2019-01-16 REA's Paramedic Crash Course® Everything You Need for the Exam - in a Fast Review Format! From the Author of REA's Best-selling EMT Crash Course® REA's Paramedic Crash Course® is the only book of its kind for the last-minute studier or any prospective Paramedic who wants a quick refresher before taking the National Registry Paramedic (NRP) Exam. Targeted, Focused Review - Study Only What You Need to Know? Written by Dr. Christopher Coughlin, an EMS Program Director and paramedic with 27 years of experience, Paramedic Crash Course® relies on the author's careful analysis of the exam's content and actual test questions. It covers only the information tested on the exam, so you can make the most of your valuable study time. Our fully indexed targeted review covers all the official test categories including airway and breathing, medical emergencies, trauma, special patients, and EMS operations. Expert Test-taking Strategies? Our experienced author explains the structure of the exam, so you know what to expect on test day. He also shares detailed question-level strategies and shows you the best way to answer questions. By following our expert tips and advice, you can score higher on every section of the exam. pn pharmacology online practice 2020 a: *COVID-19 and Nutraceuticals, A Guidebook* Prof. Chandan Prasad, PhD, Prof. Güler Öztürk, PhD, The rapid rise in Covid-19 infection to a pandemic stage in the face of lack of few choices for treatment, prevention has taken a special purpose in this battle. The 1918 Spanish Flu with no vaccine to protect against the infection and no antibiotics to treat secondary bacterial infections associated with influenza infections, control efforts worldwide were limited to non-pharmaceutical interventions including, isolation, quarantine, good personal hygiene, use of disinfectants, and limitations of public gatherings, which were applied unevenly. These same measures hold good for Covid-19 pandemic today. Nutraceuticals and Functional foods for many reasons, largely its perceived safety, have gained popularity in disease prevention. Also, in the last 2-3 decades there have been well designed and controlled basic and clinical investigations that have steadily added credence to nutraceuticals for disease prevention. This book is a

compilation of reviews of data on different nutraceuticals that may be of relevance to Covid-19 pandemic. These include, probiotics, melatonin, plant bioactive, lipoic acid, curcumin, selenium, zinc, magnesium and boron to name some.

pn pharmacology online practice 2020 a: Med-Surg Success Kathryn Cadenhead Colgrove, 2016-08-15 Assure your mastery of medical-surgical nursing knowledge while honing your critical thinking and test-taking skills. The 3rd Edition of this popular resource features over 2,300 questions (including 550 alternate-format questions) that reflect the latest advances in medical-surgical nursing and the latest NCLEX-RN® test plan. They organize the seemingly huge volume of information you must master into manageable sections divided by body systems and specific diseases

pn pharmacology online practice 2020 a: Nursing2020 Drug Handbook Lippincott, 2019-03-15 Still THE #1 Drug Guide for nurses and other clinicians, always dependable, always up to date! Look for these outstanding features: Completely updated nursing-focused drug monographs featuring over 3,700 generic, brand-name, and combination drugs in an easy A-to-Z format NEW 34 brand-new FDA-approved drugs in this edition, including 31 complete monographs—tabbed and conveniently grouped in a handy “new drugs” section for easy retrieval NEW More than 8,100 clinical updates —new dosages and indications, Black Box warnings, adverse reactions, nursing considerations, clinical alerts, and patient teaching information NEW ISMP-recommended tall-man lettering for look-alike-sound alike drugs Special focus on U.S. and Canadian drug safety issues and concerns Photoguide insert with images of 455 commonly prescribed tablets and capsules Plus FREE companion Toolkit available online through NDHnow.com Monthly FDA updates featuring newly approved drugs, indications, and warnings Pharmacology videos, audio pronunciation guide, and English-Spanish translator Equianalgesic dosing guidelines for opioid drugs Mechanisms and sites of action graphics for selected drugs NCLEX® style questions, free CE tests, plus bonus discounts and more!

pn pharmacology online practice 2020 a: Coronavirus Disease (COVID-19): Pathophysiology, Epidemiology, Clinical Management and Public Health Response (volume I.C) Zisis Kozlakidis, Denise L.Doolan, Shen-Ying Zhang, Yasuko Tsunetsugu Yokota, Tatsuo Shioda, Rukhsana Ahmed, Mohan Jyoti Dutta, Ata Murat Kaynar, Michael Kogut, Hannah Bradby, Slobodan Paessler, Alex Rodriguez-Palacios, Alexis M. Kalergis, Longxiang Su, Abdallah Samy, Zhongheng Zhang, 2023-04-25 Volume I.C An outbreak of a respiratory disease first reported in Wuhan, China in December 2019 and the causative agent was discovered in January 2020 to be a novel betacoronavirus of the same subgenus as SARS-CoV and named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Coronavirus disease 2019 (COVID-19) has rapidly disseminated worldwide, with clinical manifestations ranging from mild respiratory symptoms to severe pneumonia and a fatality rate estimated around 2%. Person to person transmission is occurring both in the community and healthcare settings. The World Health Organization (WHO) has recently declared the COVID-19 epidemic a public health emergency of international concern. The ongoing outbreak presents many clinical and public health management challenges due to limited understanding of viral pathogenesis, risk factors for infection, natural history of disease including clinical presentation and outcomes, prognostic factors for severe illness, period of infectivity, modes and extent of virus inter-human transmission, as well as effective preventive measures and public health response and containment interventions. There are no antiviral treatment nor vaccine available but fast track research and development efforts including clinical therapeutic trials are ongoing across the world. Managing this serious epidemic requires the appropriate deployment of limited human resources across all cadres of health care and public health staff, including clinical, laboratory, managerial and epidemiological data analysis and risk assessment experts. It presents challenges around public communication and messaging around risk, with the potential for misinformation and disinformation. Therefore, integrated operational research and intervention, learning from experiences across different fields and settings should contribute towards better understanding and managing COVID-19. This Research Topic aims to highlight interdisciplinary

research approaches deployed during the COVID-19 epidemic, addressing knowledge gaps and generating evidence for its improved management and control. It will incorporate critical, theoretically informed and empirically grounded original research contributions using diverse approaches, experimental, observational and intervention studies, conceptual framing, expert opinions and reviews from across the world. The Research Topic proposes a multi-dimensional approach to improving the management of COVID-19 with scientific contributions from all areas of virology, immunology, clinical microbiology, epidemiology, therapeutics, communications as well as infection prevention and public health risk assessment and management studies.

pn pharmacology online practice 2020 a: The Difficult Airway

David B. Glick, Richard M Cooper, Andranik Ovassapian, 2012-12-05 The Difficult Airway provides a comprehensive textual and visual coverage of how to deal with patients who have expected or unexpected difficult airways. The text begins with a description of the incidence and importance of the difficult airway and then describes the ASA Difficult Airway Algorithm created to facilitate the management of "difficult airways." The majority of the book features a comprehensive step-by-step approach to the rescue techniques listed as part of the ASA Algorithm. Noted experts in each of the techniques have been recruited by the book editors to present the information. Figures throughout the book illustrate important points and procedures. This is a wonderful resource for professionals in the health care field including anesthesiologists, intensive care physicians, emergency room physicians, nurses, and out-of-hospital first responders.

pn pharmacology online practice 2020 a: Study Guide for Pharmacology for Nursing

Care - E-Book Jacqueline Burchum, Laura Rosenthal, Jennifer J. Yeager, 2015-02-10 Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Lehne's Pharmacology for Nursing Care, 9th Edition, this robust workbook features critical thinking study questions, case studies, and patient teaching scenarios that help you connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. NCLEX Examination-style questions are included in each chapter. NEW! NCLEX-style alternate format questions including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. NEW! Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses.
